Profile

Fullstack Web Developer with 3 years of experience in building modern web applications, including professional work and advanced personal projects. Specialized in the MERN stack (MongoDB, Express.js, React, Node.js) and modern full-stack development technologies. Experienced in Firebase and Supabase for authentication, real-time data management, cloud functions, storage, and backend-as-a-service solutions. Strong expertise in developing secure APIs, scalable backend systems, and responsive user interfaces. Self-driven, detail-oriented, and results-oriented.

Education

Bachelor's Degree in Computer Science

2020 - 2023

ENI (National School of Computer Science), Fianarantsoa

- Algorithmics and data Structures
- Web Development
- Databases (MongoDB, Firebase, Supabase)

Employment

Web Developer

Jan 2022 - Dec 2022

FluenTech, Madagascar

- Developed a task management web application
- Built a full e-commerce platform
- Implemented secure authentication systems
- Improved UI/UX and SEO performance
- Integrated cloud-based and real-time features

Web Developer

Jan 2023 - Dec 2023

Tech Solutions, Paris

- Developed modern web applications using Next.js, React, and Node.js
- Designed secure REST APIs with JWT authentication
- Built responsive and accessible user interfaces
- Improved performance and user experience
- Collaborated with technical teams

Personal Projects

Fullstack applications using MERN stack

2023 - Present

Built fullstack applications, SaaS platforms, secure APIs, and e-commerce solutions

- Fullstack application development using the MERN stack
- Development of SaaS platforms, secure APIs, and e-commerce solutions
- Implementation of modern, responsive, and multilingual user interfaces
- SaaS task management application (fullstack architecture)
- Secure API following OWASP best practices
- Complete e-commerce platform
- Real-time application using Supabase (authentication and cloud database)
- Application built with Firebase (authentication, storage, and notifications)
